Professional Summary

Highly detail-oriented computer science graduate with extensive expertise in Linux environments, C++, and systems programming. Familiar with full-stack web development, scripting, and database programming. Proficient in leveraging software development techniques to address complicated issues and working collaboratively.

Technical Skills

Category	Skill Sets
Languages	C, C++, Python, Bash, Java, JavaScript, PHP, SQL, HTML, CSS
Operating Systems	Linux (Ubuntu), Windows
Developer Tools & Systems	Git, GitHub, Relational Databases Systems

Education

New Jersey Institute of Technology, Newark, NJ
Bachelor of Science in Computer Science | **Graduated: May 2025**

Academic Skills and Abilities:

- **Intensive Programming in Linux:** Comprehensive knowledge of developing system architecture through Bash and C programming.
- **Programming Language Concepts:** Applications and object-oriented programming using C++.
- **Internet Applications:** Full-stack web pipeline design using HTML, JavaScript, CSS, SQL, and PHP.

Technical Projects

ForecastFlex.com Accounts Payables Prototype (2024) | *Python, JavaScript, SQL, PHP*

- Developed an end-to-end automation program from scratch for Nuboe.com to simplify the process of invoice sorting and data collection.
- Developed a back end that enables PDF files uploaded by users to separate and process information related to specific vendors.
- Developed a relational database module to appropriately track and sort vendor data according to user-specified query conditions.

House of Health Management Platform (2024) | *HTML, JavaScript, CSS, SQL, PHP*

- Designed and deployed a user-friendly clinic management tool that supports multi-client appointment process management (CRUD).
- Developed the backend using SQL which processes the user requests in real time to avoid clashes in appointments.
- Built an intuitive user interface to streamline the workflow for administrators to better support their work.

Professional Experience

Web Designer Intern (2024) | *Shameless Product Placement*

- Created, improved, and deployed a fully functional company website that was designed from scratch.
- Used CSS and JavaScript to boost client responsiveness, improving user experience and site metrics.
- Closely coordinated with marketing professionals to create a website that aligned with the business's overall brand strategy.

Waitstaff / Service Coordinator (2024-2025) | *Ramen Gami*

- Successfully facilitated high-order transactions using the POS systems.
- Solved problems and dealt with customer questions efficiently in high-stress situations.
- Followed strict protocols regarding safety, sanitation, and smooth operations at all times.

Scanning Associate (2025-Present) | *Innodata*

- Operated the IBML and Ricoh scanners for the inputting, validating, and processing of large amounts of documents with an emphasis on accuracy and quality.
- Utilized database software for updating, verifying, and organizing document records, maintaining data integrity efficiently.
